Switch design features

Multiple configurations (Single Side, Bay, Left Corner & Right Corner) in various sizes.

1. Natural flame appearance

Features state-of-the art Switch FX technology. Natural looking, multi-dimensional, multi-color flickering flames. Full, high-intensity RGB color wheel enables endless color choices. Full color spectrum for downlighting and media bed lighting, with multiple settings easily operated via slide control.

Trans-seasonal

Heat or no heat. Flame- and light-only for ambient illumination during warmer months; quick, effective room heating for cooler months.

Eco-friendly

Zero-emission heat source, no harmful smoke or greenhouse gases. No gas lines or venting required.

Energy efficient

No heat is lost up a chimney or vent. Long-life LED lamps consume the same energy as a lightbulb. Lower operational costs.

2. Modern aesthetics

Sleek, clean-lined style for various fireplace designs: wall-mounted, flush, or partial recess. Two types of media included: clear and smoke acrylic stone, and hand-painted canyon driftwood log set for a more authentic fireplace appearance.

Design & installation freedom

Vent-free, self contained, zero-clearance design for limitless installation versatility. Easily installed in indoor or outdoor* spaces – homes, apartments, condos, townhouses, hospitality and commercial premises. Frame into wood or metal studs, into partial or non-load-bearing walls.

*approved for outdoor installation under a patio cover or overhang, and not directly exposed to the elements.

Safe alternative

Cool to touch with heat ON or OFF. Ideal for residential, hospitality and other commercial spaces.

3. Built to last

Crafted from durable black, satin powder-coated mild steel. LED lighting.

Easy to use

Comes with full-feature remote control and optional wireless wall mounted control. Easily adjust the look of the fireplace, from the flame pattern, color, accent lighting, to the heat output - all at the touch of a button.

Optional sizes

Comes in six sizes: from compact fireplaces with a smaller footprint, to linear fires with elongated flames. Sizes are: 44", 56", 68", 80", 96" and 120".

Included Accessories

Canyon Driftwood Logs Set

Decorative Media

Remote Control

Optional Accessories

Wall Mount Touch Control
